The fuel consumption, CO<sub>2</sub>, electric range and electric energy consumption values (as applicable) are measured in a controlled environment on a representative production model, in accordance with the requirements of the WLTP European regulation EC 2017/1151 and its applicable amendments. For each individual vehicle configuration, the final fuel consumption, CO<sub>2</sub>, electric range and electric energy consumption values (as applicable) may be calculated based on the ordered optional equipment. The values of your vehicle may vary from those measured or calculated values, as driving behaviour as well as other factors (such as road conditions, traffic, vehicle condition, tyre pressure, load, number of passengers, etc.) have an influence on a car's fuel consumption, CO<sub>2</sub> emissions, electric range and electric energy consumption.
